

**Crafted for the modern world**

Traditional **vertical**  
**sliding** sash windows

# A traditional look for any property

The Sliders UK Veka Vertical Slider combines the timeless elegance of a traditional vertical sliding sash window with the functional benefits and performance of a modern PVCu system.

**A centuries-old design, the sliding sash window is not only an original feature of period buildings – it has become an increasingly popular choice for homeowners and developers of newer properties wishing to replicate the charm of bygone times.**

For both, the Sliders UK Veka Vertical Slider offers the perfect solution. Expertly crafted, it retains the authentic features of traditional hardwood vertical sliding sash windows, but with the added benefits that modern PVCu systems can provide.

## Specifications:

- Energy rating of C-A is confirmed on BFRC certificate 10/B130

### Energy Efficient

Using VEKA's PVCu profile and hardware from the industry's leading vertical hardware specialists, Sliders UK's range of vertical sliding sash windows offer a traditional frame design with modern aesthetics and a superior A, B or C Window Energy Rating.

**The Sliders UK Veka Vertical Slider will enhance the appearance of any property - period or contemporary, residential or commercial, town or countryside. With a variety of finishing options to choose from, Sliders' vertical sliders can complement any style or taste.**

- Manufactured using VEKA's latest PVCu profile design, Sliders' vertical sliding sash windows are available in Veka white PVCu as well as in a variety of attractive and authentic wood-like finishes, including light oak, rosewood and white.
- Sliders UK use only the highest quality hardware from the industry's leading vertical hardware specialists – choose from chrome, white or gold or satin silver.
- Customers can further individualise their window specification with decorative horns and by choosing from a variety of glazing options, including toughened/laminated/obscure/argon filled glass, a range of textured glass patterns, diamond lead finish, and surface mounted Georgian bars.

### Modern day high performance

Utilising the functional benefits and performance of a modern PVCu window system, the Sliders UK Veka Vertical Slider is practical, secure and energy efficient – ideal for the modern home or office.

- Being PVCu, the frame requires minimal maintenance and is easy to clean. Property owners don't have to face the chore of endless sanding, painting and varnishing as they would with hardwood frames. PVCu can be easily wiped clean. The tilt mechanisms on both sashes makes the Sliders sash window even easier to keep clean.
- PAS 24 compliant, it incorporates a range of enhanced hardware features to give property owners assurance and peace of mind. These include ultra secure key locking sash locks and keeps. Opening restrictors are also available to limit the sash opening and provide additional safety.
- Sliders' sash windows have achieved energy ratings of C through to A as is confirmed on BFRC certificate number 10/B130. This contributes significantly to a property's overall thermal performance, helping to reduce its negative impact on the environment.
